CAREER OBJECTIVE

A person who thinks outside the box and likes to communicate with people. I want to build my career as a Software Engineer.

As a technology enthusiast, I am very passionate about computer and programming since my university life. Before starting my university, I've been working for Market Express Ltd. as a brand promoter which was a project under Microsoft. I dream to be an expert software engineer with some market knowledge so that I can build professional and useful software that has business value. **I am looking for a junior software engineer position in a reputed software company that can help me to achieve my goal.**

I am in my final year studying computer science and engineering at the State University of Bangladesh and also engaged with many extracurricular activities like **tech-related video making, presenting, researching, project planning, project team-leading, managing development club, and maintaining open source community as well.**

EXPERIENCES

> Django Developer (Trainee)

SKILLS

> Python, Django, SQL, API, Git, Basic Frontend, Virtual Environment, JavaScript, C, Java.

> Communication, Teamwork, Presentation, Marketing, User Interaction & Experience.

PROJECTS

> Food Service Framework

(C2C, Distributive System, Blockchain, Python-Django, API, Android)

A Django powered open source C2C web application for ordering homemade food cooked by housewives. This will also be a distributive system like Uber. We are in the beginning stages of this project as we have just developed the web version for a demo. This system will be based on the android app and we will apply blockchain infrastructure in the future. This project was funded by Prof. Dr. A S M Touhidul Hasan. This application will be very helpful for the students and service holders who are living outside from home and aren't able to consume homemade food. We want to develop a C2C and distributive framework not only for food but also for other services and write a research paper based on this project.

* Live App: food-service-system.herokuapp.com

* GitHub: github.com/siyam04/food-service-system-django

> Portfolio and Blog Publications Site

(Python-Django, JavaScript)

A Django powered open source web application for publishing articles, videos and manages the personal portfolio, and in the debugging stage now. This project is maintaining by our team named 'DevsCave'. I and my team member's portfolio added to this project.

* Live App: blog-and-portfolio.herokuapp.com

* Portfolio: blog-and-portfolio.herokuapp.com/portfolio/siyam

* GitHub: github.com/siyam04/blog-and-portfolio-django

> Shanirvor Bangladesh (স্বনির্বর বাংলাদেশ)

(Python-Django, Django Rest API, JavaScript)

A Django powered, open source web-based software which will launch soon. The official name of this project will be 'SHANIRVOR BANGLADESH'. It's a local freelancing platform application and in the testing stage now. This project is under the 'Khidmah IT'.

* GitHub: github.com/siyam04/shonirvor

> Other Projects & Contributions:

I know how to use C and python as I have solved some online/offline problems using them. On top of this, I built a basic application based on Java GUI during my 2nd year of university. I also contributed to some other projects that my colleagues and friends have

made. I want to increase my knowledge by learning more tools and technologies so that I can develop better projects in the future.
